

Installation Instructions

- 1 - Disassemble light fixture to expose wiring.
- 2 - Un-mount the existing switch from the light fixture.
- 3 - Remove the wire-nuts or crimp-ons from all wires.
- 4 - Mount the dimmer in the lamp base using the thumb nut provided. Pull knob off shaft for this step.
- 5 - Press the knob onto the shaft. Pressing too far may cause the knob to bind. The knob should rotate smoothly.
- 6 - Rotate the knob fully counter-clockwise to turn it off.
- 7 - Connect the RED wire from the dimmer to one of the lamp wires.
- 8 - Connect the BLACK wire from the dimmer to the - Ground wire.
- 9 - Connect the WHITE wire from the dimmer to the other lamp wire and to the + 12 volt wire.
- 10 - Turn on the dimmer until just after the switch engages. The light should be dim. If the light is off, reverse the +12V and -Ground wires.
- 11 - Re-assemble the light fixture.

Connections For Incandescent Lamp, LED or Motor
