

12 Volt DC Lamp Dimmer and Fan Speed Control

Fits where other 12 Volt DC dimmers can't!

Dimmer Switch Shown Actual Size

The smallest dimmer of its kind in the world!

Dims up to 60 Watts (4.2 Amps) of incandescent, halogen, or LED lighting reducing heat and power drain on batteries and can be used anywhere your customers want to control 12 Volt DC lighting.

Replace the existing on/off switch in an RV's lamp fixture and give your customers the ability to create low-light ambiance. It can also be installed to dim lighting in yachts, boats, trailers, cars, motorcycles, etc. The speed of a 12 Volt DC fan can also be controlled by using the included diode.

Includes easy to follow pictorial, quick start instructions with all the components needed for easy installation. Installation and technical support are available to your customers free of charge by calling 888-892-0761 x 126 or emailing dimmer@pca.com.

Increase your profits by up-selling and installing our dimmers on every maintenance or custom project you do. Since miniature 12 Volt DC dimmers of this type are not available in big box home improvement stores, you have the opportunity to offer a unique product and custom service with no competition.

Countertop display rack available to increase sales when used at the checkout register or your service department counter.

Quality engineered and manufactured in the USA
Each dimmer comes with a 1 Year Limited Warranty

Attractive tamper-resistant blister pack easily fits most retail pegboards
